

25 February 2021

TO WHOM IT MAY CONCERN

First of all, I would like to take this opportunity to congratulate Adriel Sebastian A/L Joseph from Monash University Malaysia who has completed his 3 months industrial training as Assistant Engineer in Foresight Asia Pacific.

During this 3 months internship course from Dec 2020 to Feb 2021, he has closely worked with me under engineering department. He has demonstrated an outstanding performance and a good working attitude. This young man is highly motivated and driven as well as willing to learn as much as possible and takes up new challenges.

Besides understanding and learning up the design and manufacturing process flow, he is also willing to hands-on and experience by himself to further improve his knowledge and skill set. He is always focused on his work and get thing done within given time frame. This proves that this young man is highly committed towards his work.

He has a mature thought and ask some questions that related to his career which I think he has set a good direction and understand what he wants to achieve in his career path. He is responsible, dedicated and hardworking person. He completed all tasks and honest to report whenever made mistake. So far to be the best training student to commit the very least mistake.

Last but not least, he is trustable person whom you should not miss to hire him.

Yours sincerely,

*Steven Lau*

Engineering Manager
